## iTOMS

Academy Management Software

A screenshot of the iTOMS software interface. The top header shows a hamburger menu, a notification bell with a '1', a user profile icon, and the text 'Name'. The main content area is titled 'Annual Inservice' with a '+New' button. Below this is a search section with a 'Search' label, an 'Inservice Year' input field, and a 'Search' button. Further down is a table with columns 'Year', 'Course', 'Hours', and 'Action'. The table contains two rows: one for '2026' with 'ORIENTATION TO THE ARMMS BEHAVIOR MODULE' and '4' hours, and another for '2025' with 'Adult Learning' and '8' hours. Each row has 'Edit' and 'Remove' buttons in the 'Action' column. A 'Show' dropdown and 'entries' label are also visible above the table.

Our cloud-based iTOMS software allows you to create academies and courses, schedule classes, and add attendees. You can also keep a list of inventory used for certifications even if your agency does not own the weapon.

Introducing our comprehensive cloud-based software solution tailored specifically for law enforcement agencies. Our platform revolutionizes how police academies and training programs are managed, offering a seamless and efficient experience for administrators and officers alike. Our software allows agencies to create and manage police academies, develop and schedule courses, and track class attendance and scores in real time. The system also includes advanced features for inventory management, ensuring that weapon inventory is meticulously tracked and maintained. Officers can conveniently self-subscribe to classes, streamlining their training process and ensuring they stay up-to-date with the latest protocols and skills.

Our user-friendly interface and robust functionality make it easier than ever to coordinate and optimize training efforts, helping law enforcement agencies maintain high standards of preparedness and operational readiness. By leveraging our cloud-based technology, agencies benefit from enhanced accessibility, data security, and scalability, ensuring that training programs can grow and adapt to meet evolving needs. Whether you're managing a large metropolitan police force or a small local department, our software is designed to support and enhance the critical work of law enforcement training and administration.
